EXPERIENCE

Freelance Web Developer

July 2024 – Jan 2025

- Completed few freelance projects for small businesses, focusing on website design and functionality.
- Successfully delivered projects on time and received commendations for quality and professionalism.

Web Developer intern ([Hofferio](#) | [Hotel Marketing Studio](#))

July 2024 – Jan 2025

- Developed dynamic React components and widgets for enhanced user experiences, ensuring seamless integration with existing systems.
- Managed and manipulated API data to build responsive and efficient features, optimizing performance and user interaction.
- Created API and deployed on AWS EC2 machine for fast response and low latency

Full Stack Web Developer ([ZCorp](#))part time*

Jan 2025 – Feb 2025

- Developed and optimized features for the **HRMS project**, resulting in a **20% improvement in processing speed** and enhanced user experience. Fixed bugs and optimized backend logic for salary and employee data management.
- Created a page for the company based on their requirements.
- Tested and deployed projects on Bluehost.
- Managed and manipulated API data to build responsive and efficient features, optimizing performance and user interaction.

Web Developer ([Prop4u](#))

Jan 2025 – Present

- Created multiple templates and improved performance to increase reach.
- Built multiple dashboards to store user information in one place and reduce overload on the CP.

PROJECTS

Web Development Projects

News Website Project ([news-portal-github](#))

- Developed a dynamic news website using PHP, JavaScript, AJAX, CSS, and Bootstrap.
- Key Features:
- User Functionality: Users can read news articles, watch videos, and post comments.
- Admin Functionality: Admins can post, modify, and delete news articles.

Job Posting Website Project ([job-portal-github](#))

- Developed a comprehensive job posting website using React, MongoDB, Node.js, and Express.js.
- Key Features:
- User Functionality: Users can log in, browse job listings, and apply for job positions.
- Admin Functionality: Admins can post new job listings, review applications, accept or reject applications, and change the job status of users.

Collaboration Listing Website ([hoferollab page](#))

- Independently developed a collaboration listing website with responsive UI, allowing users to apply for posts and featuring an admin panel for efficient post and application management.

HR Management System ([HRMS](#))

- Fixed backend admin logic for salary and other table columns.
- Added functionality to correctly download data in Excel format, with the ability to download filtered data.
- Fixed multiple small issues while working on this.

Project and contact Page ([Landing Page](#))

- Created this page based on the client's Figma design, including a user form with a small backend.

Company Landing Page ([Landing page](#))

- Updated this page by adding new features, making it responsive, and integrating a contact form that handles data with PHP.
- Created an admin panel to manage the data, allowing the admin to directly respond to users using built-in email features.

EDUCATION
